### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

The references to Schollhorn disclose a calculations of the coefficients of a non-recursive filter for shifting the frequency response of the filter from one characteristic frequency (cut off frequency)  $f_{c1}$  to another characteristic frequency  $f_{c2}$ . The reference to Stikwoort discloses a coefficient generator aslo for a non-recursive filter having a non-rational ratio between input and output sampling frequency. The references to schollhorn and Stikwoort and the other prior art of record do not teach or fairly suggest a variable sample rate recursive digital filter in which a new coefficient of an adaptive digital filter is determined as a function of an initial coefficient and a sampling ratio of an initial sample rate and a new sample rate such that the frequency response of the adaptive digital filter is constant at both sample rates.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
